McArthur Group's grit bins are designed to store salt, sand, grain and garden equipment in a rust, rot and weather resistant polyethylene shell. The high durability and visibility means it's perfect for extreme weather conditions and use in private or public spaces.

Our stackable bins are more cost effective for storage and distribution and as they don't require assembly, can be used where and when they are needed.

The bins have easy access for filling and emptying as well as fully integrated hinge and drain holes which help make these products almost maintenance free.

The bins come in yellow but other colours are available on request. All bins are embossed with the word "grit" which can also be personalised on request.

Essential winter equipment from
