

UltraBAR™

**A FENCE FOR ALL REASONS
THE REVOLUTIONARY
ADAPTABLE RAILING SYSTEM**

Through cold roll forming technology, UltraBAR™ provides patented raking joint system. Both secure and flexible UltraBAR™ will give the installer the angle he desires instantly.

The UltraBAR™ system is the lightest and most adaptable system available today. UltraBAR™ has been developed for ease of erection, being supplied in pre-assembled panels that simply bolt into place.

30° of rake for vertical railing systems. Allows railing to be installed in the most awkward areas without the need for stepping.

20° of rake for the bow top applications.

PLAYGROUND AND SCHOOL PERIMETERS

UltraBAR™ complies with RoSPA specifications for children's playgrounds and is also ideal for school perimeter requirements.

HOUSING SCHEMES

Aesthetically pleasing and easily blends with local architecture UltraBAR's balanced uprights and rails makes an ideal choice for urban regeneration.

PARKS AND LEISURE

Traditionally styled, cost effective railing systems.

COMMERCIAL & INDUSTRIAL APPLICATIONS

For boundary applications that are secure and pleasing to the eye, an architects favoured choice.
